New and improved in QuickBooks Point of Sale 18.0

Move around your store with POS

QuickBooks Point of Sale works with the Microsoft Surface® Pro¹ giving you the ability to move around your store more easily. Check inventory from anywhere in the store. go directly to customers on the store floor to ring up sales. Then all you need to do is complete the sale with the selected payment method at the counter.

Customer balances at your fingertips

You'll see big improvements on the sales receipt that puts the the most important information at your fingertips. You'll see the customer's balance and available credit displayed in plain sight without any additional clicks. You'll also see customer email and contract info here too.

Simply hover to uncover rewards

Hover over the rewards certificate and you'll see if a customer has earned a reward. You'll also see details on how much a customer has to spend to earn the next reward. Giving instant reward balances to your customer is a great way to drive additional sales.

See customer details with a click

No need to leave your sales transaction to get more details on your customer. Simply click on the blue "more info" button. You'll instantly see the customer's contact details, notes you've made and purchase history all in one spot.

Choose the Payments plan that fits you

You can now select our Pay as you go plan with no monthly fee.

Save big on additional seats

Get a discount on Pro or Multi-Store seats 2-20.

1. Microsoft Surface® Pro sold separately. Microsoft, Surface, and Windows are trademarks of Microsoft Corporation.

2. EMV chip debit cards can only be processed as PIN debit transactions using the magnetic stripe card reader or as credit transactions using the EMV PIN Pad at this time. This EMV Ready PIN Pad is currently unable to process EMV chip debit cards as PIN debit transactions using EMV PIN Pad. QuickBooks Point of Sale Payments account is subject to eligibility criteria, credit and application approval.
